

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. This law has been a Godsend. I used to receive at least 6 to 7 calls a night...now it may be once a month. After a very busy and hectic day at work, I hate being bothered with those unsolicited calls that invade my time to enjoy my family and relax. Since this law, it has been like night and day...please....please do not do any thing that will change this. Thank you so much for your attention to this request.

Sincerely,  
Patty York
